EXPEDITION PLAN: OPTION 1 (DIRECT OFF-ROAD DESERT ROUTE)

103A FIELD TO AL FEEL FIELD | DIRECT OVERLAND TRANSIT VIA SIRTE & JUFRAH BASINS

ROUTE: OPTION 1
DIST: ~1,150 KM OFF-ROAD

1. TACTICAL WAYPOINT SCHEDULE (OPTION 1)

LEG / POINT	COORDINATES	TERRAIN TYPE	DIST.	TOWNS / LANDMARKS / FUEL NODES
Start: 103A	29.040°N, 20.783°E	Gravel Track	0 km	103A Concession Base / Marada North [Fuel A]
WP 01	29.476°N, 20.247°E	Hard Reg	75 km	Sirte Basin Plains / Zelten Axis
WP 04 (Fuel B)	29.015°N, 18.001°E	Transitional Dunes	235 km	Zillah Support Corridor (Refuel Bowser Staging)
WP 07	29.157°N, 16.131°E	Open Plateau	240 km	Al Jufrah Basin Approach (Hun/Waddan S)
WP 10	27.380°N, 15.016°E	Soft Sand / Fesh-Fesh	247 km	Samnu / Sebha North Axis
End: Al Feel	26.058°N, 11.976°E	Industrial Field	357 km	Al Feel (Elephant) Field Terminal Depot [Fuel C]

2. OPTION 1 TRACK MAP & FUEL DISTRIBUTION DIAGRAM

EXPEDITION PLAN: OPTION 2 (AJDABIYA & SIRTE HIGHWAY CORRIDOR)

103A FIELD → AJDABIYA → SIRTE (OVERNIGHT) → WADDAN → SEBHA → AL FEEL FIELD

ROUTE: OPTION 2
DIST: ~1,420 KM (PAVED + STAGING)

1. TACTICAL HIGHWAY SCHEDULE (OPTION 2)

PHASE / LEG	ROUTE CORRIDOR	SURFACE TYPE	DIST.	KEY MILESTONES & FUEL / HOTEL STAGING
Day 1: Leg A	103A Field → Ajdabiya Junction	Paved / Field Road	~210 km	Transit north to main coastal highway. Refuel at Ajdabiya hub.
Day 1: Leg B	Ajdabiya → Sirte City	Coastal Highway (N1)	~390 km	Coast road transit; refuel at Sirte commercial stations. **Hotel Overnight Stay**.
Day 2: Leg C	Sirte → Waddan / Hun	Inland Highway (Al Jufrah)	~250 km	Morning departure south through Al Jufrah oasis belt. Commercial fuel available.
Day 2: Leg D	Hun → Sebha → Murzuq Axis	Paved Highway	~420 km	Transit south via Sebha bypass to Ubari/Murzuq junction. Commercial fuel station.
Day 2: Leg E	Murzuq Track → Al Feel Field	Paved + Field Track	~150 km	Final oil field access road corridor to Al Feel main terminal depot.

2. OPTION 2 TRACK MAP & FUEL STATION DISTRIBUTION DIAGRAM

COMPARATIVE ROUTE ANALYSIS & EXPEDITION INSTRUCTIONS

DIRECT OFF-ROAD (OPTION 1) VS. SIRTE HIGHWAY STAGING (OPTION 2)

1. SIDE-BY-SIDE OPERATIONAL COMPARISON

EVALUATION METRIC	OPTION 1: DIRECT OFF-ROAD DESERT TRANSIT	OPTION 2: AJDABIYA & SIRTE HOTEL STAGING	TACTICAL RECOMMENDATION
Total Distance & Duration	~1,150 km (2.5 to 3 days continuous off-road driving)	~1,420 km (2 Days split: Day 1 ~600km, Day 2 ~820km)	Option 2 is longer in distance but faster in average speed.
Terrain & Mechanical Stress	High stress; soft sand dunes, fesh-fesh, harsh washboard.	Low stress; 85%+ paved highway, smooth driving conditions.	Option 2 dramatically reduces risk of breakdown or stuck vehicle.
Fuel & Logistical Security	High risk; requires carry of 300L+ fuel + support bowser staging.	Low risk; multiple commercial fuel stations (Ajdabiya, Sirte, Hun, Sebha).	Option 2 eliminates complex fuel logistical staging.
Crew Fatigue & Comfort	High; wilderness bush camping under harsh desert conditions.	Low; hotel accommodation, hot meals, and full rest in Sirte.	Option 2 ensures well-rested drivers for long transit legs.
Security & Clearances	Oil field concession permits & remote desert tracking.	Standard highway security checkpoints + field entry permits.	Option 2 follows standard established transport corridors.

2. VEHICLE & RECOVERY SPECS

- **Platform:** Toyota Land Cruiser / Hilux 4WD Double Cab.
- **Tires:** E-rated All-Terrain tires (32-35 PSI on tarmac; 18-20 PSI for sand).
- **Spares:** 2 matching spare wheels, 12V air compressor, kinetic rope, sand ladders.

3. COMMUNICATION & SAFETY

- **Satellite Comm:** Garmin inReach / Iridium satellite messenger.
- **Water Supply:** Minimum 8 Liters of drinking water per person per day.
- **Medical:** Comprehensive trauma kit, snakebite treatment, thermal blankets.

4. OPERATIONAL VERDICT

- **Strong Recommendation: Option 2 (via Sirte)** is strongly recommended for operational efficiency, crew safety, and vehicle longevity unless an off-road desert survey is explicitly required.
